||| LARGER OPENINGS

The ultimate dilemma! If you dream of open-plan living and welcoming the beauty of the outdoors into your home, do you choose on-trend bi-folding doors, or a super slim-line sliding patio door?

BI-FOLDING DOORS

WHAT'S THE DIFFERENCE?

Bi-folds have of course become a style icon in modern architecture and have the huge draw of being able to 'remove' a full wall between outdoors and in, by sliding the door leaves to the side in a concertina effect.

SLIDING PATIO DOORS

The sliding patio door has made a huge comeback in recent years though and is the perfect choice if you're searching for minimum frame and maximum glazing. You'll also maintain all your internal space as your door panes slide neatly behind each other.

Simply stunning.

||| ALUMINIUM TRIPLE TRACK SLIDING PATIO DOORS

For larger openings, an Eclipse triple track patio door is an uber-stylish and practical alternative to the bulkiness of bi-folding doors. Without having to waste valuable space on folding sashes, your panes glide neatly behind each other when opening, leaving the full space inside your room for you to enjoy.

For an unobstructed view, our slim-frame sashes come into their own. Gliding along stainless steel runners for effortless opening, our triple track design can incorporate an opening of up to six metres.

||| ANTI-LIFT PROTECTION

Eclipse patio doors are reinforced with steel and an anti-lift system that ensures they cannot be lifted out of the frame once locked.
